- Blades are 188mm wide ,
- Large spanning capabilities
- Half Aerofoil shape ,Soft ,subtle convex curve on the underside in the closed position .
- Drip proof features
- Design tested for various wind speeds versus Blade span in accordance to NZS 3604 and Aluminium structure 1664.1:1997.

YERO Beam

- Fully engineered specifically for YERO ROOF
- 215mm Depth x 55mm Wide Beam size
- Ease of gutter and corner gutter installation
- Design tested for various wind speeds
- Design tested for various wind speeds versus Beam span in accordance to NZS 3604 and Aluminium structure 1664.1:1997.

Corner Gutter

- Fully engineered specifically for YERO ROOF
- With and without down pipe holes
- Easy to mount down pipes (65mm ,80mm diameter pipes)
- Quick mounting of gutters ,no more mitering and silicon of corners
- Made of Polycarbonate ,High temperature resistant
- Durable and High impact resistance
- Specifically used for construction industry for its unique chemical properties
- Environmental friendly
- Colors to match coatings
- Excellent for any weather conditions and high Anit-UV radiation properties.

Corner Gutter with Down Pipe

Corner Gutter without Down Pipe

Built for its purpose and application

Sun and Rain

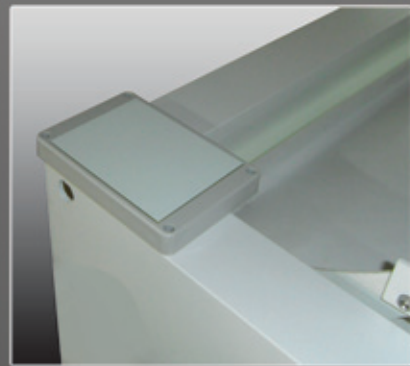

Provides shelter, privacy and sun protection from summer sun and heat.
Enjoy natural light
Allows you to make the most of the "Winter sun"
Rain sensor options available
Allows for light, shade, and air flow control in all seasons.

Insulation, Sound reduction and Air flow

Hollow and thick blade profiles allows for better thermal insulation and sound reduction
Allows the air flow to be controlled in wet and dry weather.
Allows ventilation of heat or after rain
Energy efficient, Reduces heating and cooling costs provides thermal comfort

Control

Options of remote or direct wired
Options of sensors - rain, temperature, air flow
Single or multi motor controller
Hidden operating system
